Maintainer's Quality Difference....

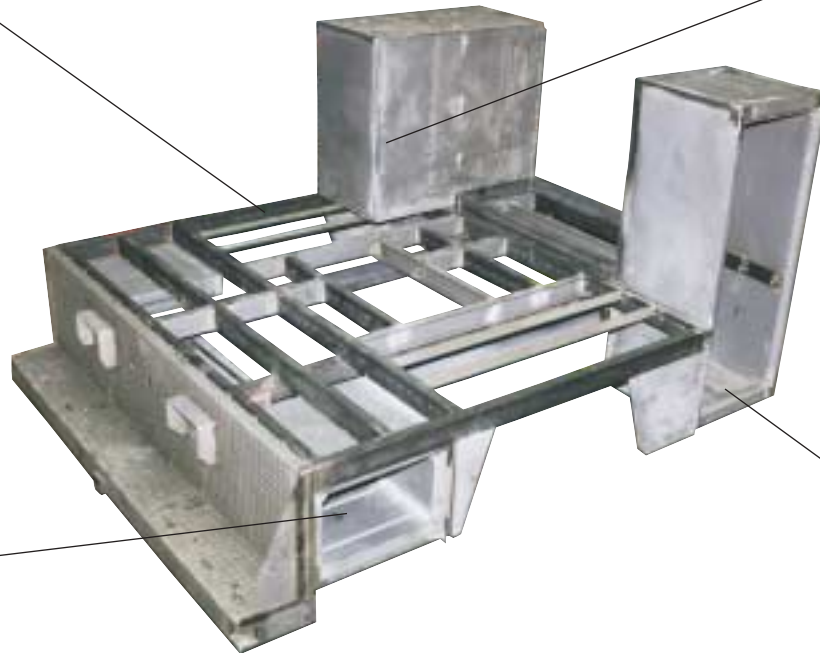

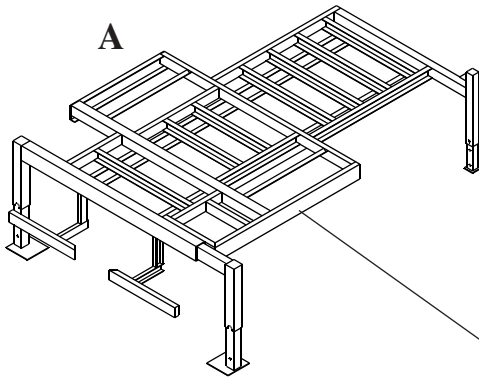

Crane base ties directly into body substructure

Inch by Inch The Best

Body substructure ties directly into chassis frame rails

A. Full length main sills with overlapping cross members are on 12" centers.

B. Single piece 11 gauge doors include stainless steel hinges with 3 pt. door latches. Doors are recessed to eliminate water traps. Hold open hold closed gas shock door holders are standard equipment.

C. Maintainer outriggers have a clean design with no exposed hoses. Cylinders and cylinder rods are fully enclosed and protected in structural tubing.

D. Cabinets are fabricated from galvanized steel to resist corrosion. Radius door openings have automotive, metal backed, bulb type weather stripping. Compartment floors are ribbed for added strength. Compartments are 23" deep and available in 42, 52, and 59" high configurations.

Maintainer's Mission....

to manufacture and market the highest quality and highest value bodies for work trucks...

to exceed our customer's expectations by being responsive, efficient, and committed to continuous improvement of our products and our organization...

to understand that the customer determines when he is satisfied and it is his perception of value and quality that counts most...

to make our customers the focus of everything we do.

Maintainer

Difference...

"We at Russell & Sons Construction Company appreciate the professional sales, service, and product Maintainer has provided us."

Larry L. Russell,
Russell & Sons Construction

★ **Sheldon**

"I feel that as we continue to update our fleet, Maintainer will be our preferred vendor because of their dedicated people and willingness to support their premium product."

Joe Chandler & Butch Ballard,
J.A. Riggs Tractor Co.

"Maintainer bodies are designed with the mechanic or technician in mind. They definitely provide a quality product."

Steve Sims, Senior Manager-
Fleet Vehicles,
Burlington Northern Santa Fe

"The truck rolled in this morning about 7:00. It looks great. We will spend the day studying all of the systems and give her a thorough shake down. We will then move in and go to work. I am very impressed with the workmanship and attention to detail."

Donald J. Hays,
Hays Utility Service

"We certainly appreciate the structural soundness and integrity of your truck bodies over other brands we are using. There is no question your quality is exceptional."

D. Michael Schumm, Elsinore Valley
Municipal Water District

"Maintainer was the most diligent of the companies responding to our bid and the only one willing to build a service truck the way we wanted it!"

Larry Baggett,
City of Colorado Springs
